7. Gap Analysis 7
8. Functional Requirements 7
9. Dashboard Design & Mapping 8
   9.1 Mapping 9
   9.2 Metrics 9
   9.3 Success Metrics 9
   9.4 Key Features 9
10. Non-Functional Requirements 9
11. Data Requirements 10
12. Assumptions & Constraints 11
   12.1 Assumptions 11
   12.2 Constraints 11
13. User Stories & Acceptance Criteria 12

1. Executive Summary

The company has experienced inconsistent sales performance over the past 6–8 months, with limited visibility into the underlying drivers of these fluctuations. This limited visibility results in reactive decision-making.
The final solution provides a structured, data-driven approach to identifying performance gaps and enables proactive decision-making through clear visibility into key business drivers provided by a centralized dashboard.

2. Business Objectives

Objective ID	Objective	Description
OBJ-01	Identify the drivers of sales inconsistency	Understand which regions, stores, and products are contributing to revenue fluctuations.
OBJ-02	Enable proactive decision-making	Provide insights that enable Sales, Marketing, and Finance to act before performance declines.
OBJ-03	Standardize reporting and KPI tracking	Ensure all teams share a single source of truth for revenue, units sold, and other key metrics.
OBJ-04	Improve alignment across departments	Ensure all stakeholders are viewing the same data to coordinate strategies and actions.

3. Scope

Scope ID	Score Area	Description	In-Scope / Out of Scope
SCOPE-01	Dashboard Development	Build a centralized dashboard showing revenue, units sold, trends by region, stores, and products	In-Scope
SCOPE-02	Alerts / Actionable Insights	Insights into overperforming and underperforming stores and products	In-Scope
SCOPE-03	Reporting Cadence	Define a regular reporting schedule (weekly/biweekly)	In-Scope
SCOPE-04	Customer Demographics	Include age, gender, loyalty program status	Out-of-Scope (not available in current data)
SCOPE-05	Marketing Campaign Creation	Design or run campaigns	Out-of-Scope
SCOPE-06	Long-Term Forecasting	Multi-year financial projections	Out-of-Scope

4. Stakeholder Identification Table

Stakeholder ID	Role / Position	Responsibility	Involvement / Influence
STKH-01	Director of Sales	Decision-maker, defines business objectives, approves dashboard	High
STKH-02	Regional Sales Managers	Provide regional sales data, validate insights	Medium
STKH-03	Store Managers	Provide store-level input, local context, customer behavior insights	Medium
STKH-04	Marketing Team	Provide campaign and product promotion data	Low-Medium
STKH-05	Finance	Validate revenue data, ensure accuracy of KPIs	Medium

5. AS-IS Process

5.1 AS-IS Process Table

Step ID	Process Step	Owner	Inputs	Outputs	Pain Points
ASIS--01	Capture sales transactions	Stores	Customer purchases	Transaction data	Limited customer behavior data
ASIS-02	Consolidate revenue	Finance	Store transaction data	Monthly revenue reports	Only aggregates totals, no insights
ASIS-03	Regional review	Regional Managers	Monthly revenue reports	Identified trends/issues	No standard KPIs; reactive analysis
ASIS-04	Local store action	Store Managers	Regional trends	Local interventions	Ad hoc, inconsistent
ASIS-05	Marketing campaigns	Marketing	Campaign schedules	Campaign results	Not aligned with sales performance
ASIS-06	Decision feedback loop	Sales, Finance, Marketing	Reports & trends	Actions taken	No visibility into root causes; inconsistent decisions

5.2 AS-IS Flow Chart

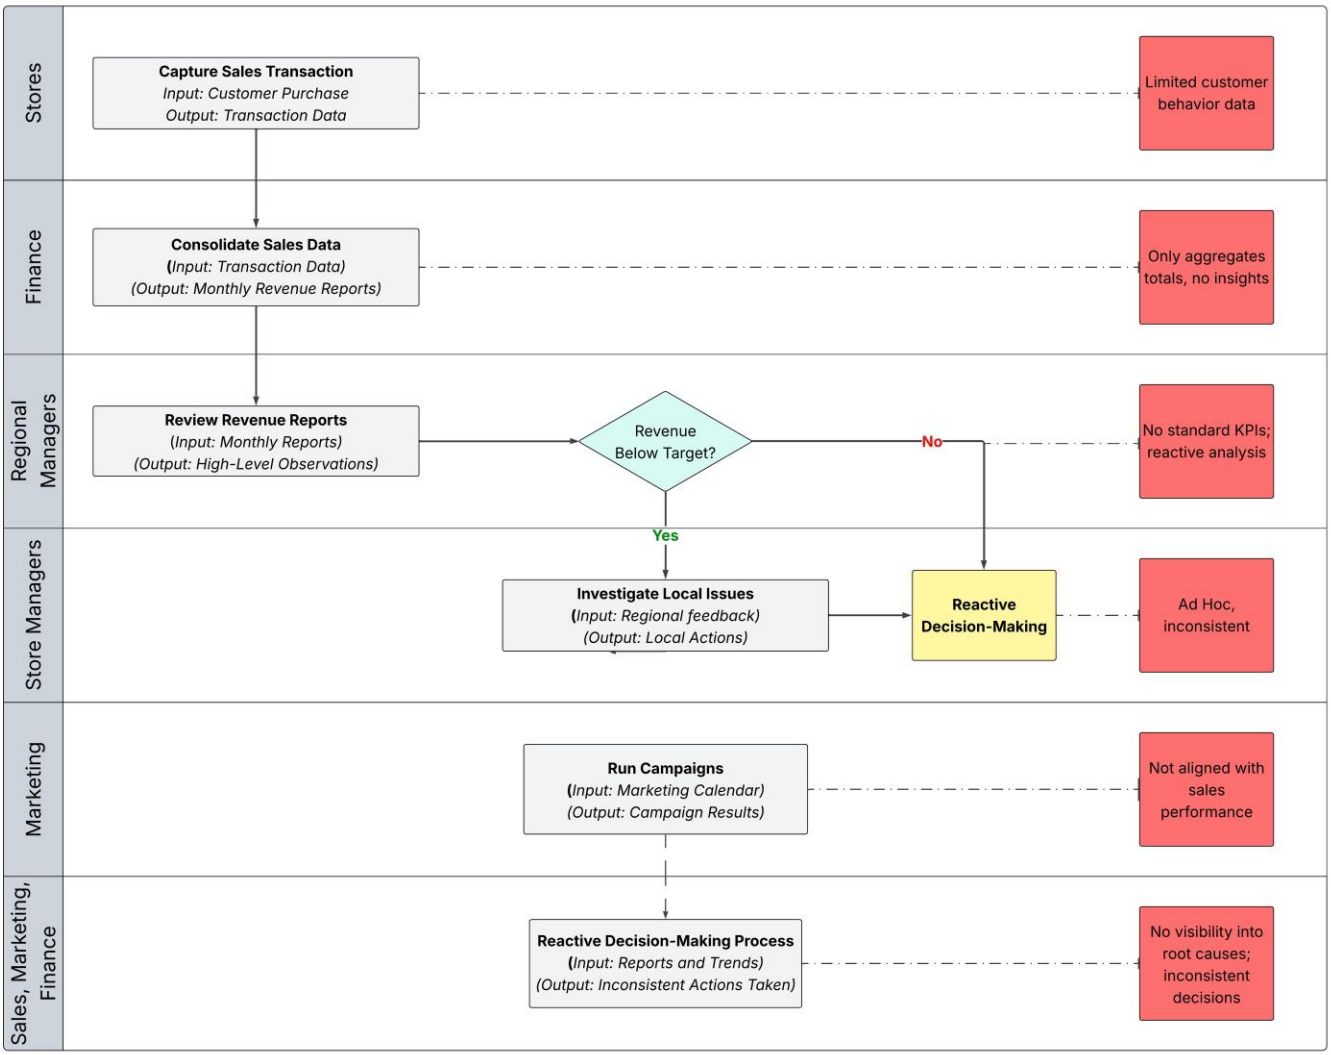

Figure 1. Current State AS-IS Process Flowchart

The current state process reveals fragmented data flows through teams and limited visibility into performance drivers, leading to delayed and reactive decision-making.

6. TO-BE Process

6.1 TO-BE Process Table

Step ID	Process Step	Owner	Inputs	Outputs	Improvement
TOBE-01	Capture sales transactions	Stores	Customer purchases	Transaction data	No change
TOBE-02	Data integration & KPI calculation	System / BI Tool	Transaction data	Updated dashboard metrics	Automated, real-time visibility
TOBE-03	Centralized dashboard access	All teams	Dashboard data	Shared insights	Single source of truth
TOBE-04	Performance Insight Identification	System	KPI comparisons	Identification of Top and Bottom Performers	Proactive issue identification
TOBE-05	Cross-functional review	Sales, Marketing, Finance	Dashboard insights	Action plans	Improved collaboration
TOBE-06	Coordinated action execution	All teams	Identified issues	Strategic adjustments	Aligned decision-making
TOBE-07	Continuous monitoring	All teams	Ongoing data	Performance tracking	Proactive vs reactive approach

6.2 TO-BE Flow Chart

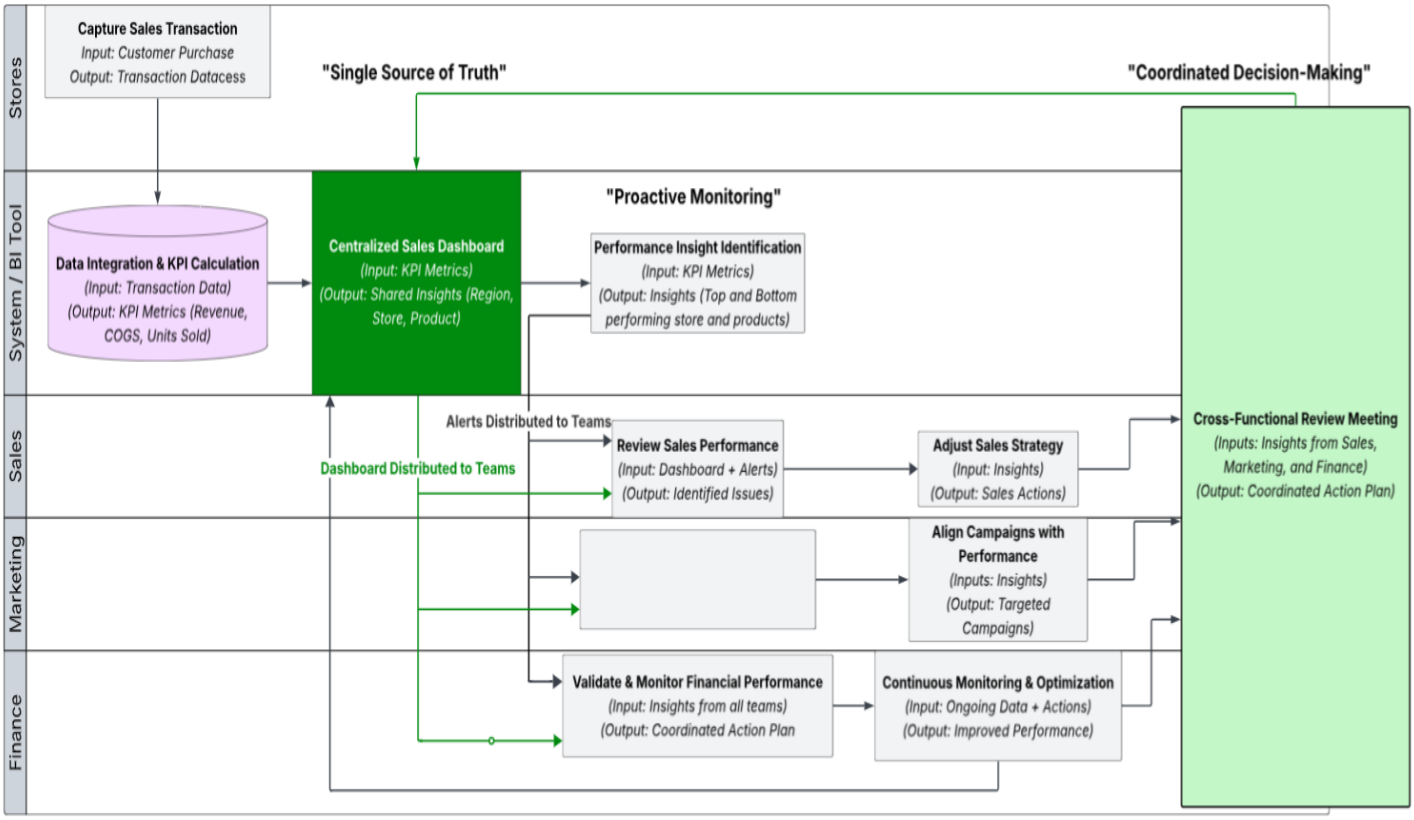

Figure 2. TO-BE Process Flowchart

The future state process offers a solution to address the lack of visibility and alignment across teams by introducing a centralized, data-driven approach to sales performance management. The implementation of this dashboard is expected to improve consistency in meeting sales targets and enable proactive decision-making.

7.Gap Analysis

The following analysis highlights key gaps between the current and future state processes.

Area	Current State	Gap	Future State
Data Visibility	Limited to transaction data	No unified view	Centralized dashboard
Decision Making	Reactive	No real-time insights	Proactive through performance visibility
Team Alignment	Siloed	No cross-functional visibility	Shared data access

8. Functional Requirements

Req ID	Requirement	Description	Priority
FR-01	Display Centralized Dashboard	The system shall provide a centralized dashboard displaying sales performance metrics across all regions, stores, and products	High
FR-02	Calculate Key KPIs	The system shall calculate and display key performance indicators including Revenue, Cost of Goods Sold (COGS), and Units Sold	High
FR-03	Integrate Transaction Data	The system shall integrate transaction data from all stores into a unified data source for analysis	High
FR-04	Provide Drill-Down Capability	The system shall allow users to filter and drill down into data by region, store, and product	High
FR-05	Enable Cross-Functional Access	The system shall allow Sales, Marketing, and Finance teams to access the same dashboard and insights	High
FR-06	Support Sales Analysis	The system shall enable Sales teams to analyze performance and identify regional and store-level issues	Medium
FR-07	Support Marketing Analysis	The system shall enable Marketing teams to analyze product trends	Medium
FR-08	Support Financial Validation	The system shall enable Finance to validate and monitor revenue performance and metrics accuracy	Medium
FR-09	Enable Campaign Alignment	The system shall support Marketing in aligning campaigns based on sales	Medium
FR-10	Enable Strategy Adjustments	The system shall support Sales teams in adjusting strategies based on performance insights	Medium
FR-11	Support Cross-Functional Review	The system shall support cross-functional review of performance data to drive coordinated decision-making	High
FR-12	Provide Continuous Monitoring	The system shall continuously update data to reflect current performance and enable ongoing monitoring	High
FR-13	Maintain Data Accuracy	The system shall ensure data consistency and accuracy across all displayed metrics	High
FR-14	Identify Top and Bottom Performers	The system shall identify and display the top and bottom performing stores and products based on revenue.	High

9. Dashboard Design & Mapping

A centralized dashboard was developed to provide visibility into sales performance, profitability, and operational efficiency. The dashboard prioritizes clarity and usability by focusing on key performance indicators and actionable insights rather than complex automation.

9.1 Mapping

Requirement	Dashboard Component
KPI Tracking	KPI Cards (Revenue, COGS, Units Sold)
Regional Analysis	Bar Chart (Revenue by Region)
Product Performance	Product Breakdown Chart
Performance Insights	Top and Bottom Performance for Districts and Products

9.2 Metrics

Metric	Description
Revenue	Total sales amount
COGS	Cost of goods sold
Units Sold	Total units sold

9.3 Success Metrics

Metric	Target
Revenue Consistency	Ability to track revenue by Store, Products
Time to Identify Performance Issues Reduced	Ability to identify issues in real-time
Dashboard Adoption	90% Usage
Decision Speed	Faster issue identification

9.4 Key Features

Key Dashboard Features
• KPI tracking
• Revenue trend analysis over time
• Regional and store-type performance breakdown
• Store-level drill-down analysis
• Product performing insights
• Top and bottom performing stores and products

10. Non-Functional Requirements

NFR ID	Requirement	Description	Priority
NFR-01	Performance	The system shall load the dashboard within 3 seconds under normal operating conditions	High
NFR-02	Data Refresh Rate	The system shall update data at a minimum frequency of every 15 minutes (or near real-time if feasible)	High
NFR-03	Availability	The system shall be available 99% of business hours (e.g., 6 AM – 10 PM)	High
NFR-04	Scalability	The system shall support increasing data volume as additional stores and transactions are added	Medium
NFR-05	Usability	The dashboard shall be user-friendly and require minimal training for Sales, Marketing, and Finance users	High
NFR-06	Security	The system shall restrict access based on user roles (e.g., Sales vs Finance permissions)	High
NFR-07	Data Accuracy	The system shall ensure data consistency across all reports and dashboards	High
NFR-08	Reliability	The system shall reliably display updated performance data without delay	High
NFR-09	Auditability	The system shall ensure consistent and accurate data rendering across all dashboard views	High
NFR-10	Compatibility	The system shall be accessible via standard web browsers (Chrome, Edge, etc.)	Medium

11. Data Requirements

Data Element	Description	Source	Used By	Notes
Transaction Data	Individual sales transactions (date, amount, product, store)	Store Systems	Dashboard, All Teams	Core input data
Product Data	Product ID, category, pricing	Product Database	Sales, Marketing	Used for trend analysis
Store Data	Store ID, region, location	Internal System	All Teams	Enables regional comparison
KPI Metrics	Revenue, COGS, Units Sold	Calculated	Dashboard	Derived from raw data
Financial Data	Revenue validation, financial reporting metrics	Finance System	Finance	Ensures accuracy

12. Assumptions & Constraints

12.1 Assumptions

Assumption ID	Assumption	Impact
A-01	Transaction data from all stores is accurate and complete	Ensures reliability of dashboard insights
A-02	Historical data for at least 6–8 months is available	Enables trend analysis and comparison
A-03	All teams will adopt and use the centralized dashboard	Necessary for cross-functional alignment
A-04	KPI definitions (Revenue, COGS, Units Sold) are agreed upon by stakeholders	Prevents inconsistency in reporting

12.2 Constraints

Constraint ID	Constraint	Impact
C-01	Limited customer demographic data available	Restricts depth of customer insights
C-02	Data refresh frequency depends on system capabilities	May limit real-time monitoring
C-03	Dashboard tool limitations (e.g., Excel/Power BI features)	May affect visualization or automation
C-04	No integration with external marketing systems	Limits campaign performance tracking
C-05	Data quality issues from source systems	May affect accuracy of insights
C-06	Revenue targets are not predefined within the dataset	Analysis is based on relative performance.
C-07	Discounting is uniformly applied at 10% across products	Limits its usefulness as a differentiating factor

13. User Stories & Acceptance Criteria

Story ID	User Story	Acceptance Criteria
US-01	As a Sales Manager, I want to view a centralized dashboard so that I can monitor overall sales performance across regions and stores.	• Given I access the dashboard • When the page loads • Then I should see revenue, COGS, and units sold across all regions • Given I am on the dashboard • When I select a specific region • Then the data should filter to show only that region
US-02	As a Sales Manager, I want to drill down into regional and store-level data so that I can identify underperforming areas.	• Given I am viewing regional data • When I click on a region • Then I should see store-level performance • Given I am viewing store-level data • When I apply filters • Then the dashboard updates dynamically
US-03	As a Marketing Manager, I want to use sales and product insights so that I can align campaigns with performance trends.	• Given I access the dashboard • When I review revenue metrics • Then the data should match financial records
